

PORTABLE

AIR IONIZER

- ▶ Filterless
- ▶ Negative ions up to 130 million /cm³ at air outlet
- ▶ Built in dual voltage power supply
- ▶ Quick air purification and deodorization
- ▶ Make you breath forest-fresh air

Advanced Ionization Technology

Negative ions eliminate airborne germs, bacteria, or pollutants.

Easy to Use

Connect with ease to your phone charger or any USB outlet.

Sleek Design

Compact, portable. Various light color lets you know it working!

Efficient

Low noise + low energy consumption.

How does it work?

Airwoods air ionizer works to clean your air by method of negative ionization.

In high enough concentrations, negative ions clear the air of pollutants.

Research from the United Nations has confirmed that ecological-grade negative ionizers can actively capture small particles of dust, causing them to condense and precipitate, effectively removes fine dust 2.5 microns (PM2.5) and smaller particles in the air. The smaller the diameter of the flying dust, the easier it is to be precipitated by negative ions.

Here are the test reports showing the removal rate of PM2.5 and bacteria by Airwoods air ionizer.

Bacterial
(Staphylococcus albus 8032)
98 %
Killing Rate

UP TO
99.08 %
PM2.5 Purifying Efficiency

Functions

Blue Breathing Light: **Sleep Mode**

Green Breathing Light: **Negative Ion Mode**

Red Breathing Light: **Low Battery Warning (<20%)**

Blue Light Flashes 3 Times: **Charging in Progress**

Steady Green Light: **Fully Charged**

Steady Blue Light: **Charging While Off**

Operation Guide

► Startup & Mode Switching

- Long press the power button for 3s to power on/off.
- In power-on state, short press the power button to switch sleep mode or negative ion mode
- Short press the light button to toggle the indicator on/off.

► Charging

- Red breathing light flashes when battery level <20% (charging required).
- Charging during operation: blue light flashes 3 times, then resumes previous mode.
- Charging when powered off: blue light flashes 3 times, then stays steady.
- Steady green light indicates full charge.

Technical Parameters

| | |
|---------------------------------|---------------------------|
| Working Environment Temperature | -10°C to 60°C, R.H.≤ 80%. |
| Working Voltage | DC 12V |
| Input Voltage | DC 5V |
| Power | 0.85W |
| Current | 0.23A |
| Battery Capacity | 3500mAh |
| Battery Life | ≥10H |
| Net Weight | 220g |
| Product Size | 80mm×80mm×58mm |

Applications

Bedroom

Living Room

Office

Car
